Exercise peering definitions

The

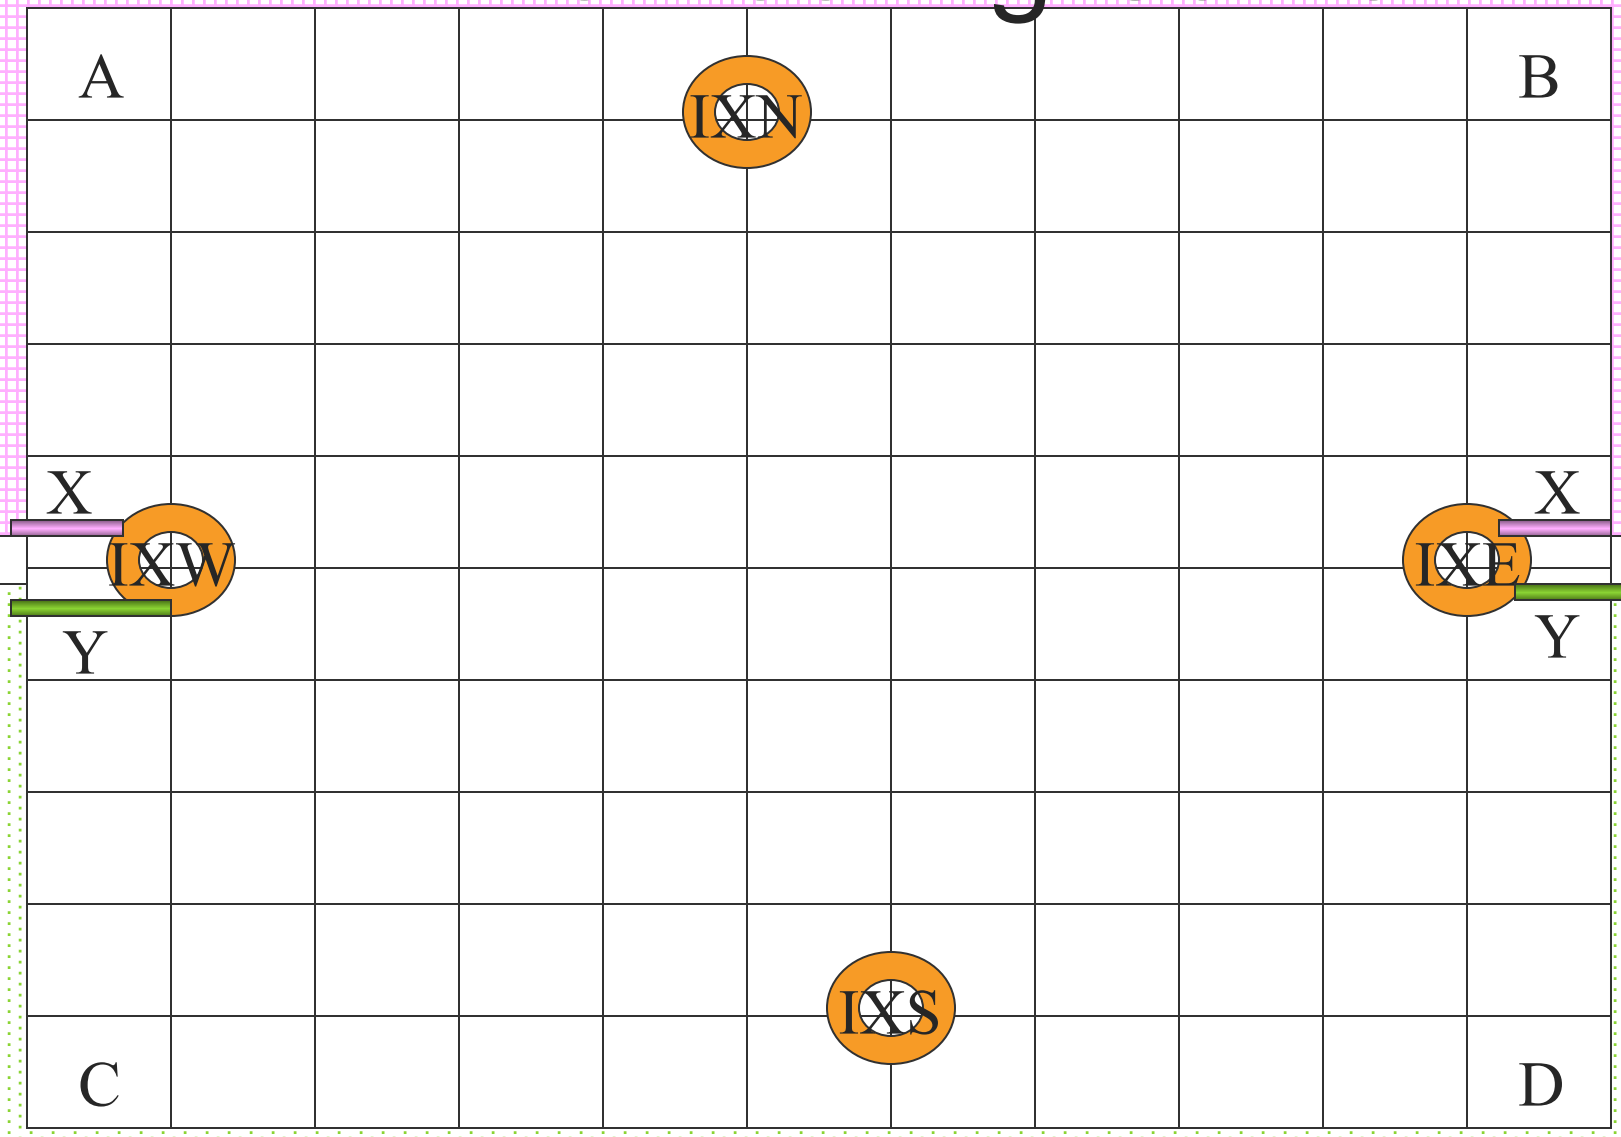
Peering Simulation Game

Apply the definitions

- Strategy Game
- Use the terminology correctly
- Negotiate Peering
- Successful in dozens of fora
- Engaging
- Fun!

Transit Provider X

The Peering Game



Transit Provider Y

3 Rules

1. Goal: **Maximize bank holdings.** Make money by acquiring customers and reduce transit costs by peering
2. Play: Roll the dice and expand your network by selecting that many adjacent "squares" of customers

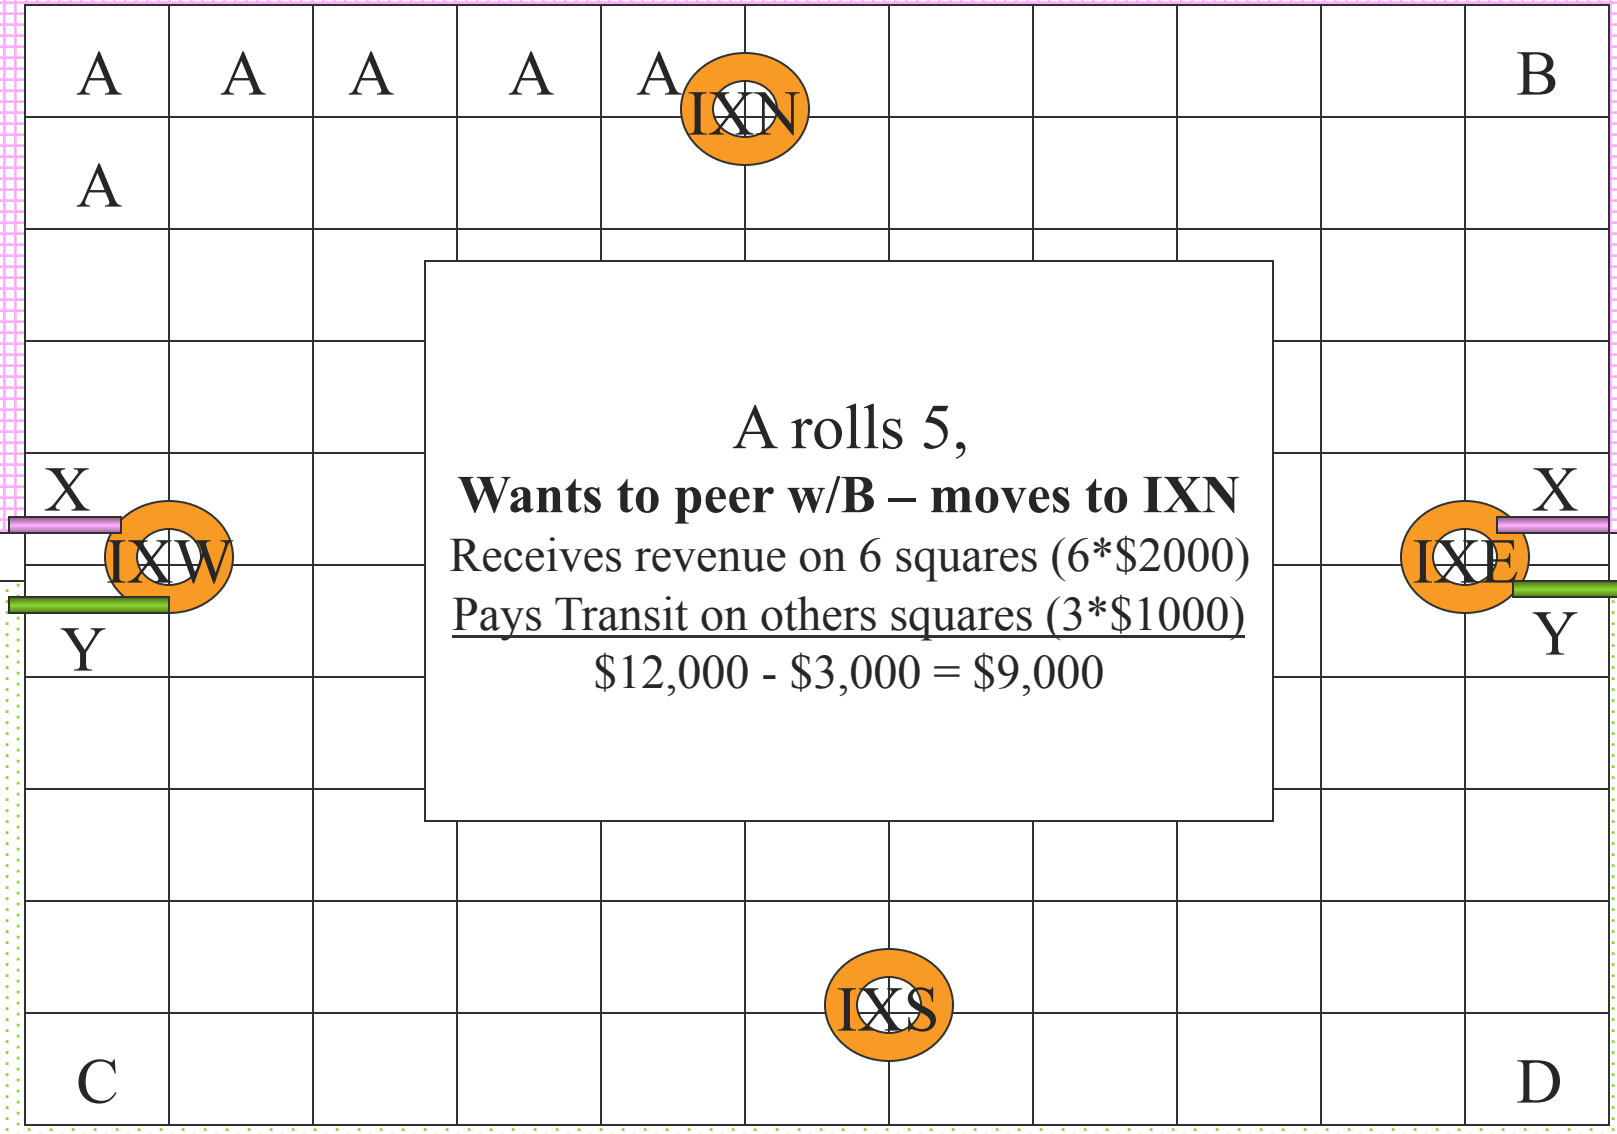
Gain transit revenue of $2000 for each customer square you own

Pay transit fees of $1000 for each square of traffic that **other** ISPs own

3. If at Exchange Point, two ISPs can **negotiate peering**:
   - $2000 recurring cost and loss of 2 turns, ISPs negotiates who covers the costs of peering

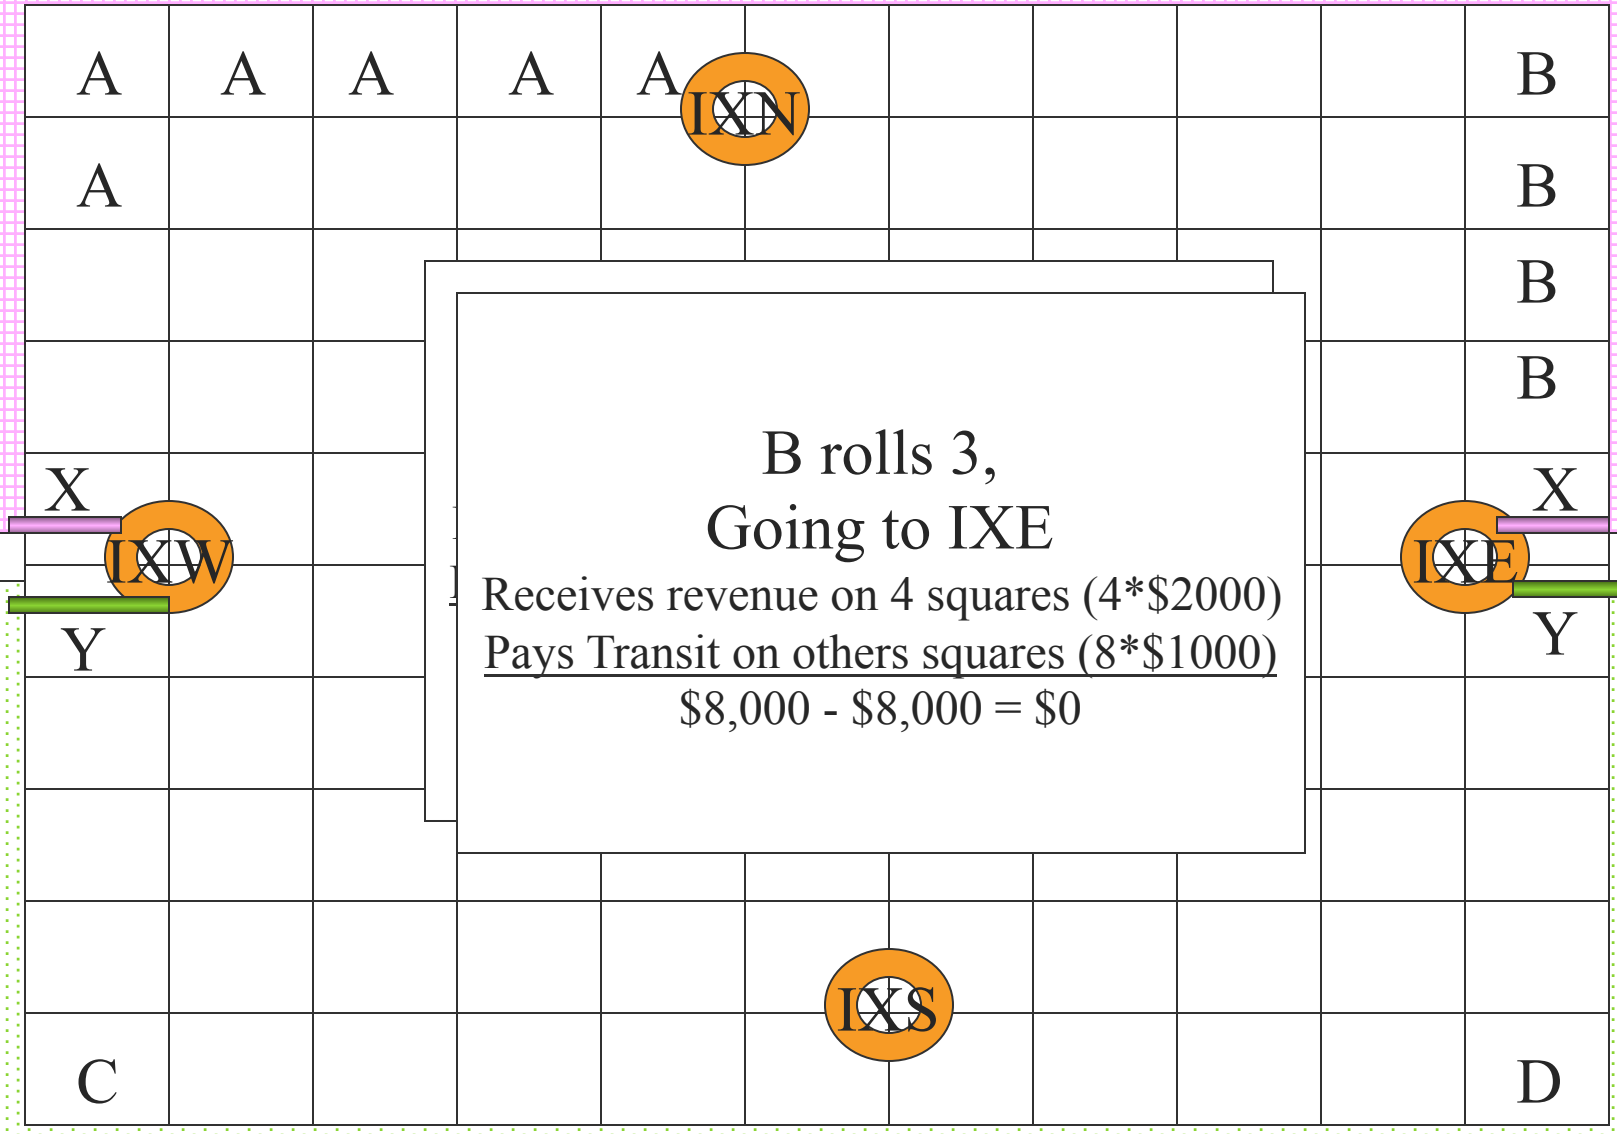
Quick round…

Transit Provider X



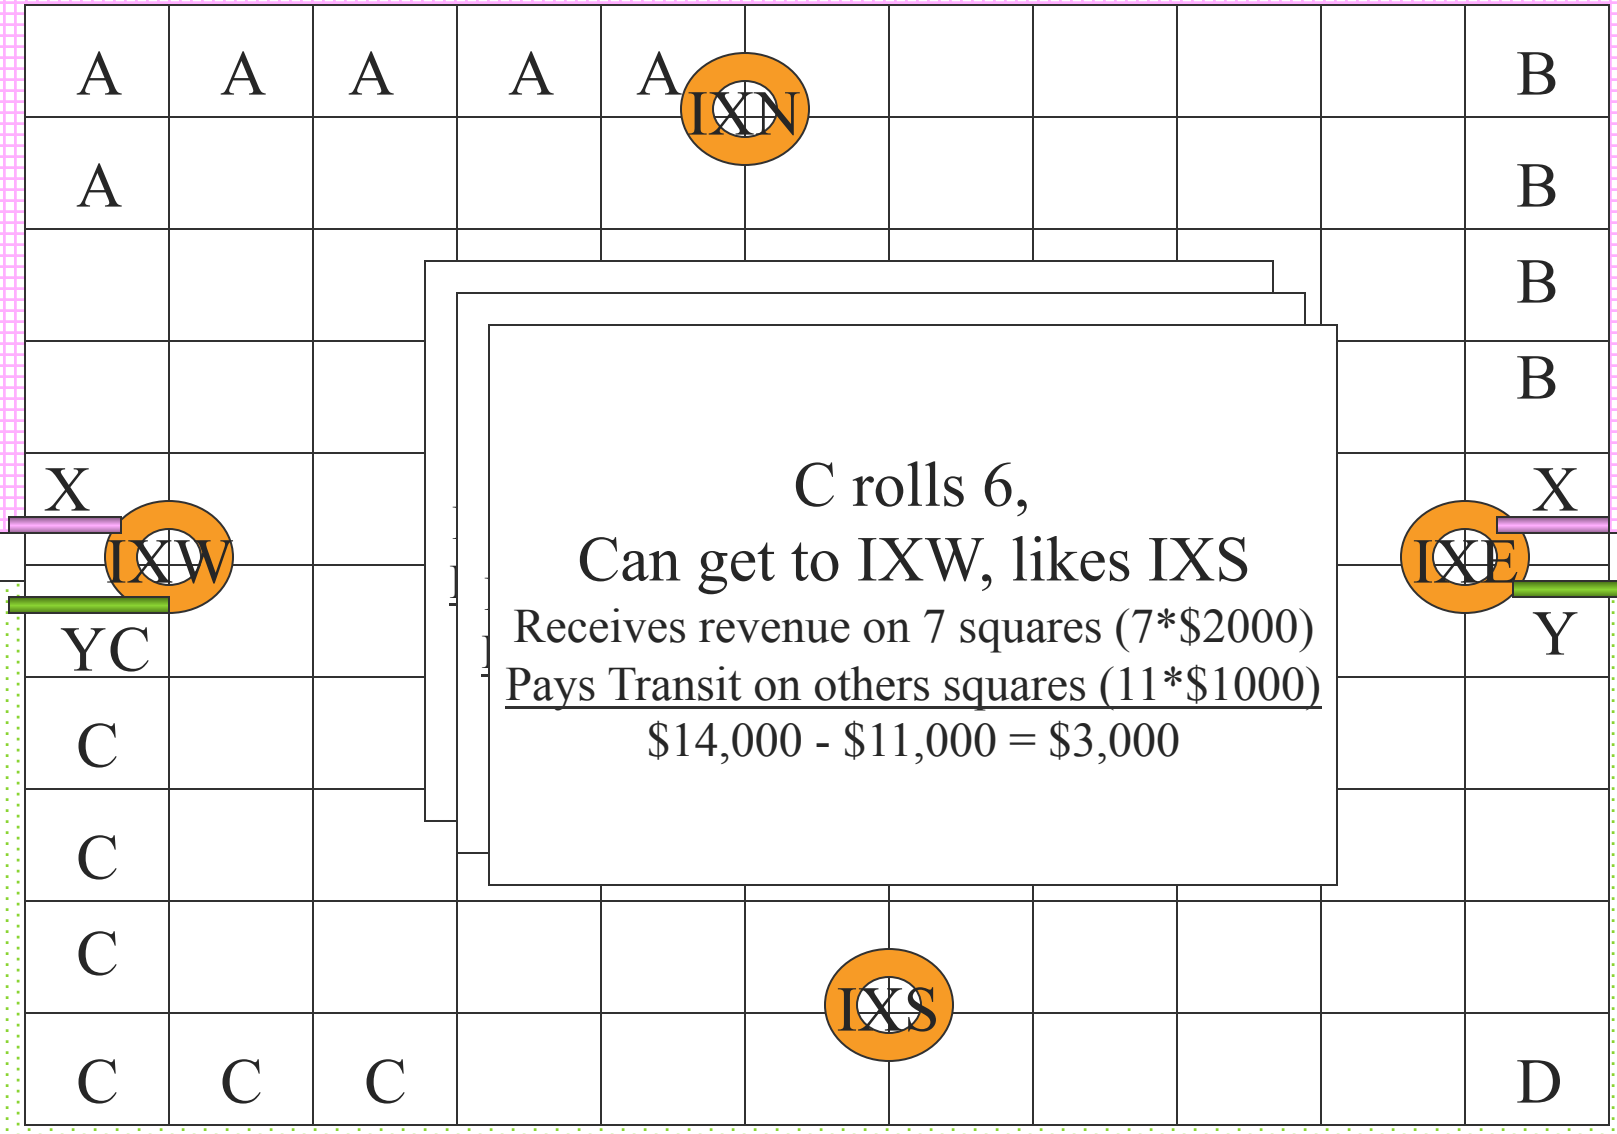
Transit Provider Y

Transit Provider X



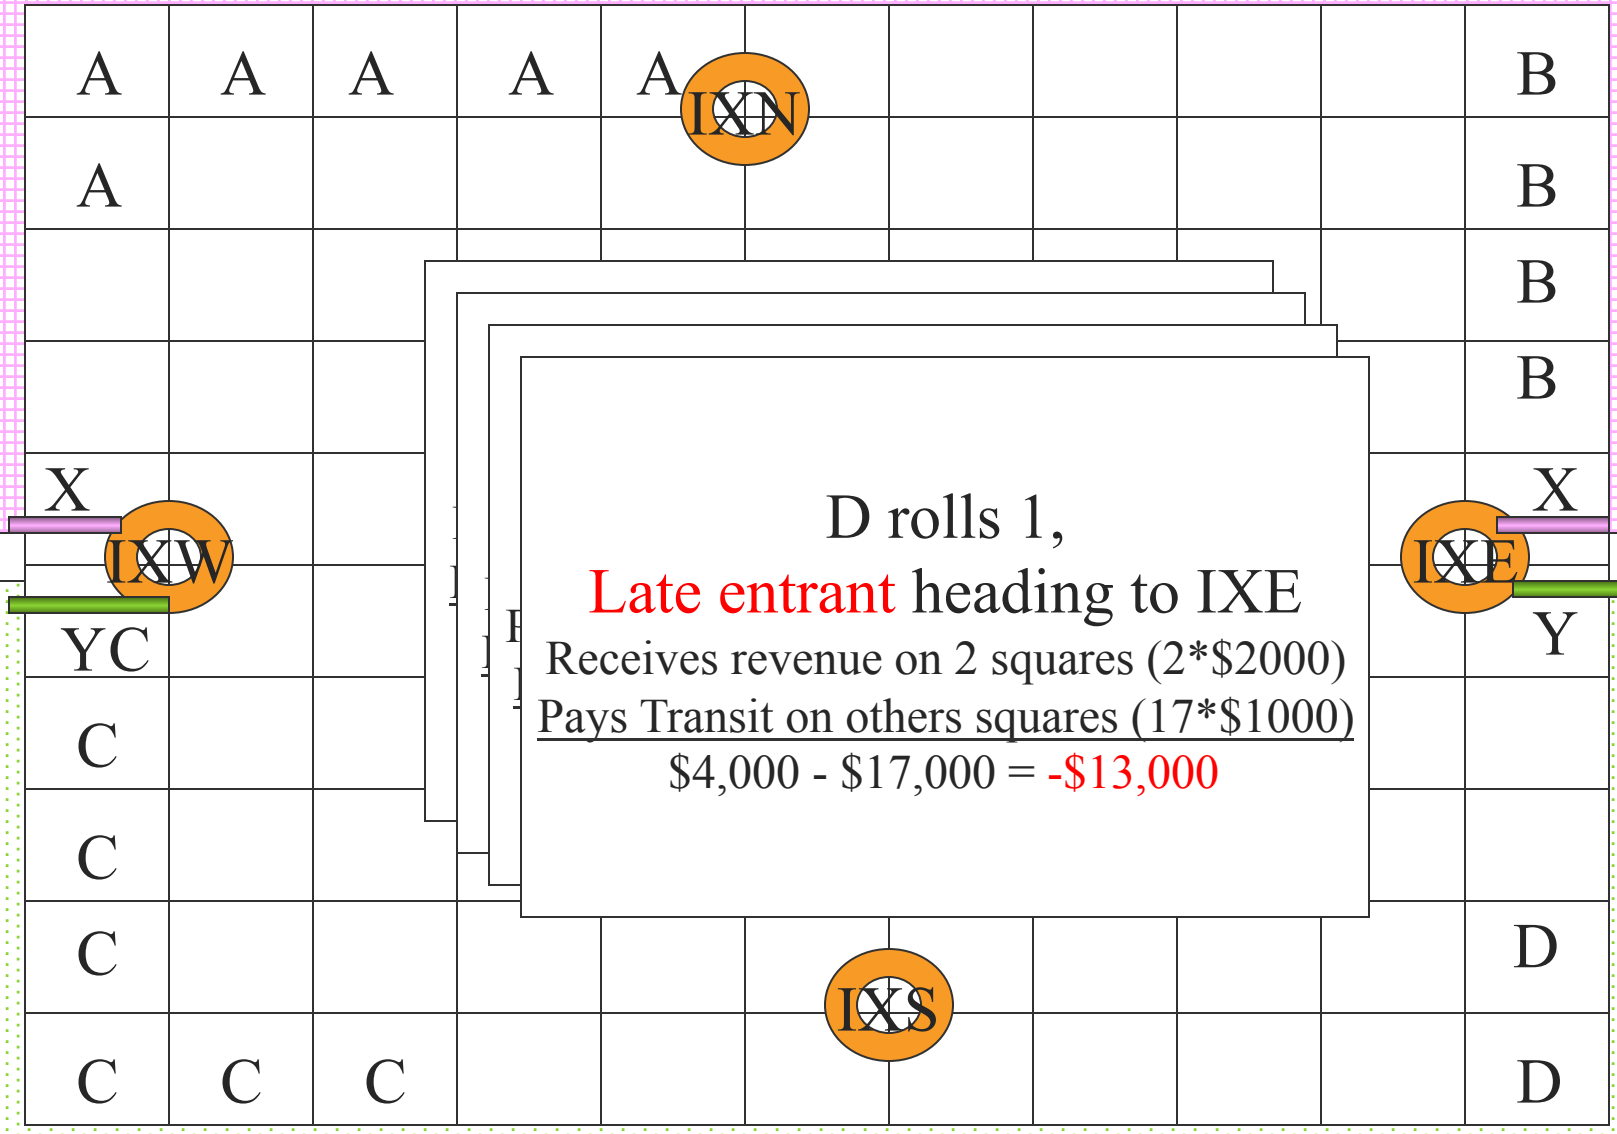
Transit Provider Y

Transit Provider X



Transit Provider Y

Transit Provider X

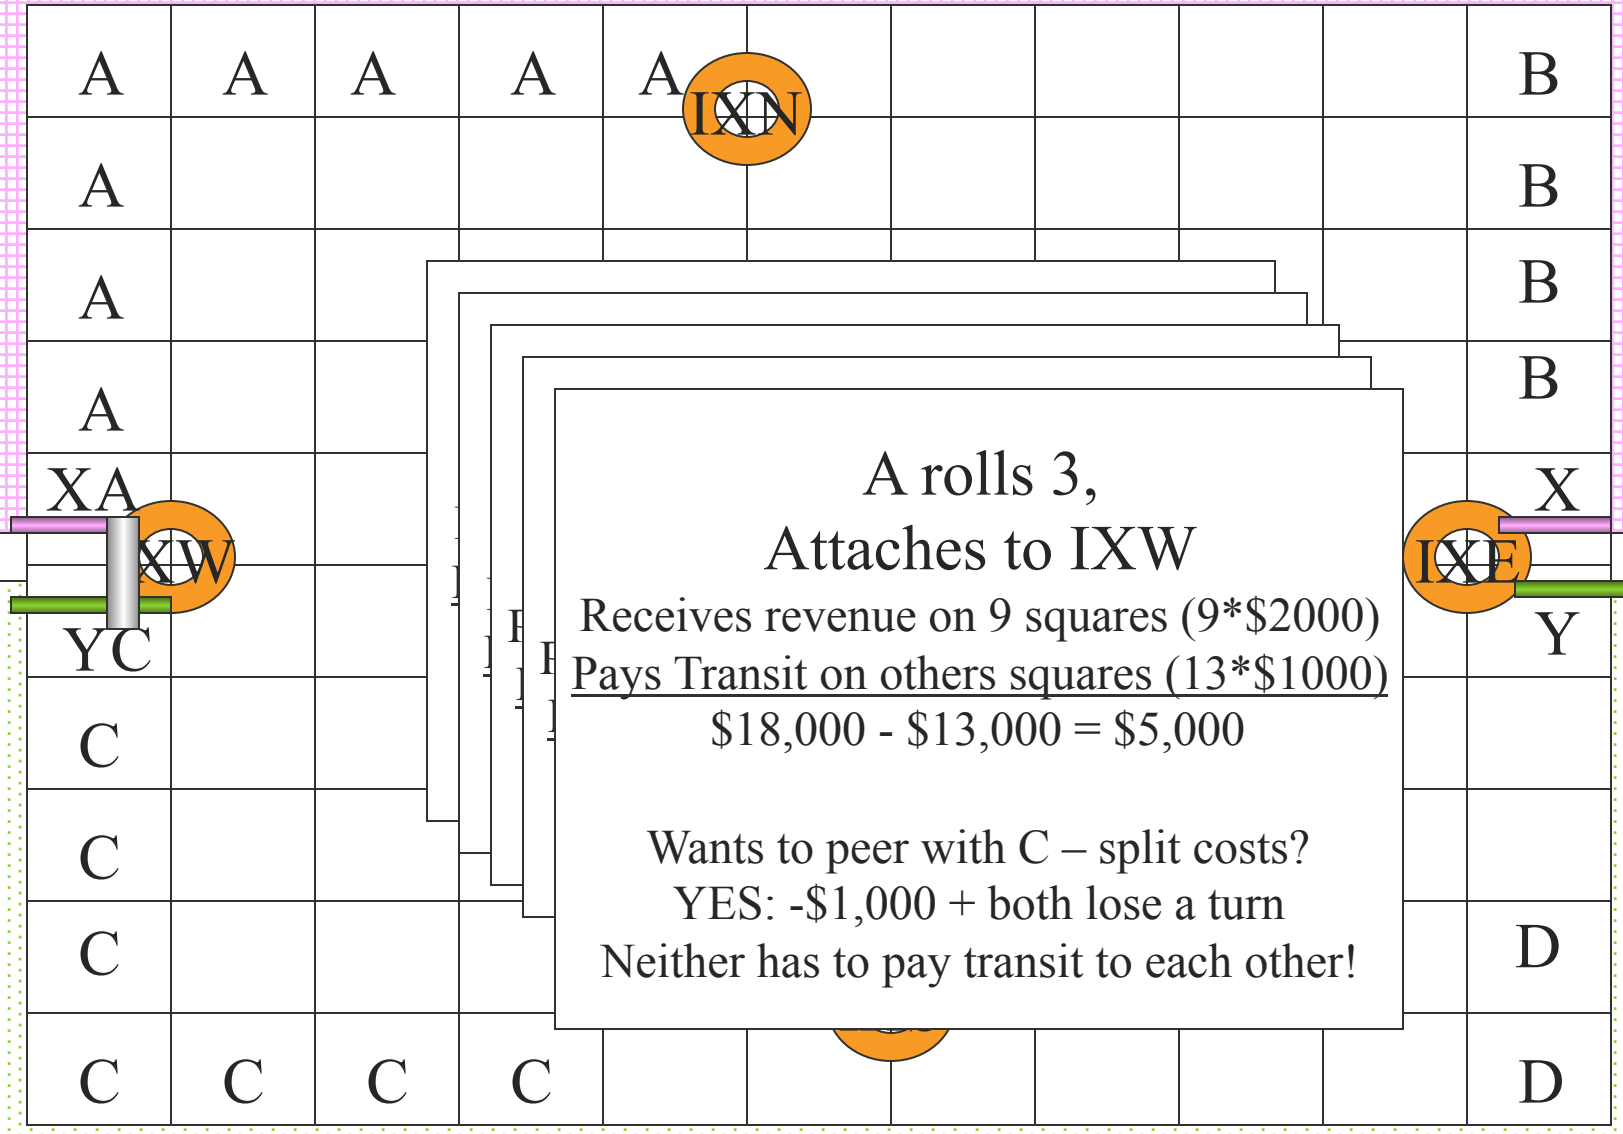


Transit Provider Y

Scoreboard after Round 1

- ISP A: $9,000
- ISP B: $0
- ISPC: $3,000
- ISPD: -$13,000

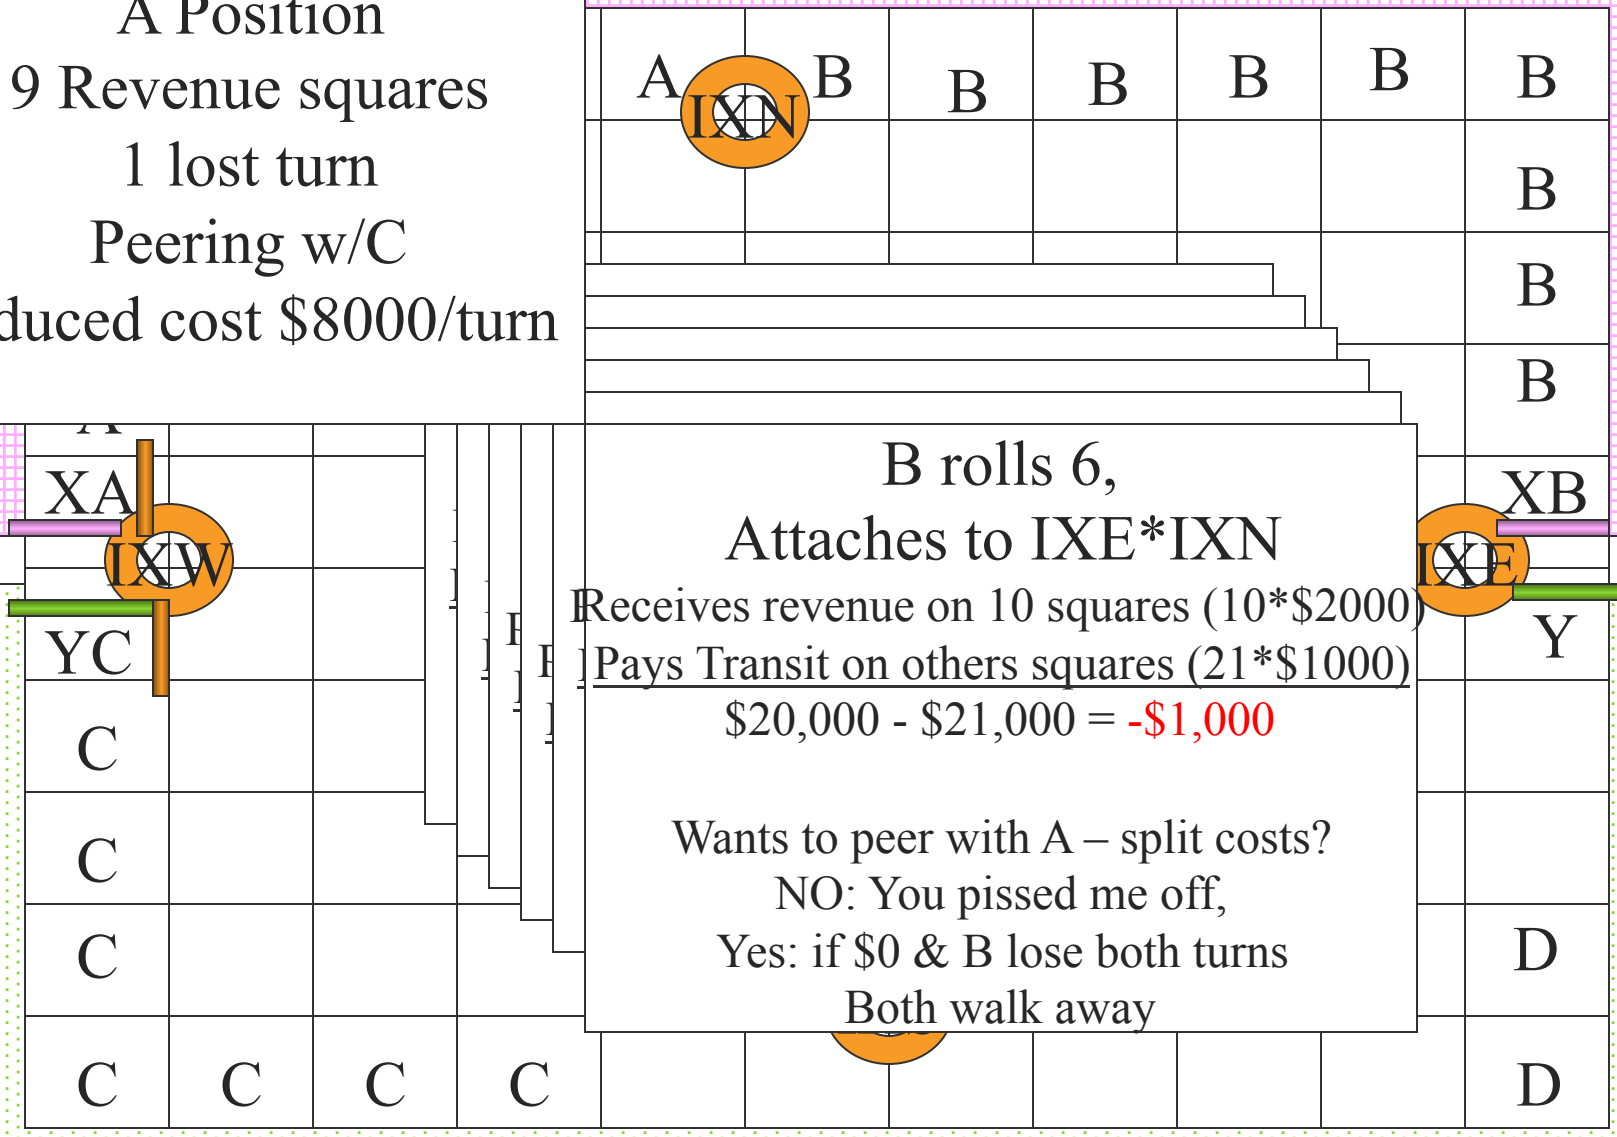
Transit Provider X



Transit Provider Y

Transit Provider X

A Position
9 Revenue squares
1 lost turn
Peering w/C
reduced cost $8000/turn



B rolls 6,
Attaches to IXE*IXN
Receives revenue on 10 squares (10*$2000)
Pays Transit on others squares (21*$1000)
$20,000 - $21,000 = -$1,000

Wants to peer with A – split costs?
NO: You pissed me off,
Yes: if $0 & B lose both turns
Both walk away

Transit Provider Y

Let's play!

WELCOME TO **BILLAND**

4 ISPs that have never played before

Open Board

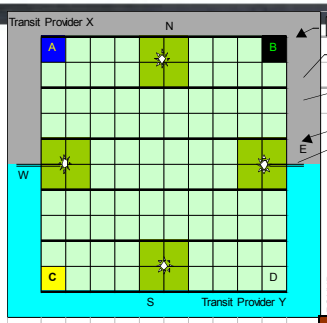
$35,000 VC Funding

~~$25,000 VC Funding~~ – HARD Economic Times

We want to hear your thought process and peering negotiations

Winner - prize

Play Game



Internet Service Provider **Starting Point**

Get **$2000 revenue** for each square you own

Pay **$1000 transit fee** to your upstream for each square others own

Internet Exchange Point East

Reduce transit fee by peering with other ISPs at exchange point; **peering costs** $2000 per round and loss of 2 turns, split how ISPs see fit

Peering Array

Calculate

Notes:

Can only move adjacently and diagonally

Hint: Calculate cost of NOT peering vs. Cost of peering

At end of game we assume all roll a 3 for remaining rolls

Winner is the ISP will the largest bank account at the end
